EDUCATION

FPT University

B.S. in Artificial Intelligence • GPA: **8.075**

PUBLICATIONS

- [1] [Low-Resource English–Vietnamese Translation: A Comparative Study of mBART-50 and NLLB](#). First author. Accepted at FETC 2025. ISBN: 978-632-609-823-5.
- [2] [Attention-Enhanced YOLO-Nano for Adverse Weather Object Detection](#). Third author. Accepted at CSoNet 2025.

EXPERIENCE

VinUni × Vingroup — AI in Action (AI20k), Cohort IV Sep 2026 – Present

Hanoi, Vietnam

- Selected for the advanced track (Levels 3–4) of Vingroup's 20,000 Applied AI Talent Program — an intensive, SFIA-aligned program pairing coursework with hands-on AI projects delivered at Vingroup companies.
- Building production-grade agentic AI systems: multi-agent orchestration with LangGraph, tool integration via the Model Context Protocol (MCP) and agent-to-agent (A2A) communication, retrieval-augmented generation, and LLM evaluation and guardrails.
- Applying LLMops and observability practices — containerized deployment with Docker and monitoring/tracing stacks (Prometheus, Grafana, OpenTelemetry) — to ship reliable, cost-aware AI services.

TPBank — CTV Data Science

Mar 2026 – Jun 2026

Hanoi, Vietnam

- Queried and explored data from the UAT database using SQL to understand banking data structures, EDA data
- Learned the **CRISP-DM** methodology and its application to real-world data science workflows in banking.
- Participated in technical mentoring sessions covering TPBank's data model, machine learning model
- Gained exposure to data profiling, data quality assessment, and data preprocessing workflows through mentor-led walkthroughs of previous project codebases.

FPT Software — Student Intern (On-the-Job Training)

May 2025 – Sep 2025

Can Tho, Vietnam

- Contributed to the development of a Java-based movie ticket booking web application in an Agile Scrum environment.
- Built a Retrieval-Augmented Generation (RAG) chatbot using Python, Qdrant Vector Database, and FastAPI for knowledge retrieval.
- Assisted the backend team by supporting Java development tasks and collaborating on feature implementation.

AI VIET NAM — AIO2024 Cohort [\[certificate\]](#)

Jun 2024 – Jun 2025

Remote

- Completed a one-year intensive residency of 300+ sessions covering mathematics for AI, machine learning, deep learning, computer vision, NLP, and generative AI / LLMs. Contributed to the AI VIET NAM Research Group; co-authored peer-reviewed papers in machine translation and object detection (see Publications).

SELECTED PROJECTS

RAG Chatbot for E-commerce Product Q&A | [github](#)

- Built a retrieval-augmented generation chatbot answering product queries for an online store: gte-multilingual-base embeddings, Qdrant vector database with cosine-similarity semantic search, and Gemini 2.0 Flash for answer generation — fast, multilingual, context-aware responses.

Fine-tuned BERT for Vietnamese Sentiment Classification | [github](#)

- Fine-tuned a BERT model on the NTC-SCV dataset for sentiment analysis; published code and training pipeline on GitHub

Vietnam News Crawling & Text Classification | [github](#)

- Built an end-to-end Vietnamese-news NLP pipeline (web scraping → EDA → model training → deployment): scraped and cleaned thousands of news articles into a structured CSV dataset, engineered TF-IDF text features and trained a multi-class XGBoost classifier (evaluated with confusion matrix and accuracy / F1), and deployed the trained model as a Flask web app for real-time classification, serializing the model, vectorizer, and label mapping for inference.

TECHNICAL SKILLS

- Programming:** Python, SQL
- Machine Learning / Deep Learning:** PyTorch, Scikit-learn, HuggingFace
- Generative AI / NLP:** RAG, LangChain, Prompt Engineering, Vectordb(Qdrant)

- **Data/MLOps:** NumPy, Pandas, Matplotlib, Seaborn, PowerBI, MLflow, Feast, FastAPI, AWS(s3, EC2), Docker, Git/GitHub

CERTIFICATIONS

- [IBM Data Science Professional Certificate](#)
- [AWS Cloud Practitioner Essentials](#)
- [Deep Learning Specialization \(Andrew Ng\)](#)
- [Project Management Principles and Practices](#)
